

# ZONA

A HUMAN CENTRIC MODULAR SEATING SYSTEM

Designed to balance functionality with emotion, form with feeling.

ZONA presents a curvaceous, sensual silhouette that reads more like a seating landscape than a traditional sofa. Designed with deep-seated comfort in mind, the design invites relaxation and offers a sculptural presence in any room.

The design centers around a compelling tri-element junction where the arm, seat, and back intersect. These elements dock and overlap like tectonic plates—each defining its own form while contributing to a cohesive whole. This design invites the sitter into the composition, reinforcing ZONA's role as both object and experience.

Inspired by nature, organic modernism, and the sculptural works of Henry Moore, it blends romance and functionality into a seating system equally suited for residential and hospitality environments.

A key innovation is the recessed plinth, which subtly curves inward where modular units connect—continuing the language of motion and soft transition seen throughout the design. Available in fully upholstered or timber finishes, the plinth not only supports the form but anchors the piece visually.

THE HUMAN FORM & ZONA A SYMBIOSIS BETWEEN BODY AND OBJECT

Seat Height: 15.7

**COM** 21 m | 23 yd

**COL** 37.8 m<sup>2</sup> | 406.9 sq ft

Different textures, grains, colouration and densities are all natural characteristics of timbers. We find these variances an inherent and valuable part of the natural beauty of wood, no two pieces are the same making each OKHA design a unique, characterful piece and each product will be different from the next. Timber movement will also occur as this is a natural product.  
STONE: Marble is a beautiful natural material with inherent imperfections in its structure, veining and coloration. As such, some slabs may be reinforced with meshing on the underside and may have colour matched resin fills in minor cracks and surface blemishes. Please note that this is standard practice.  
METAL: All metals will go through a process of natural aging and oxidization due to environmental conditions. The result of this aging process will bring about colour change, to slow and reduce this natural process, appropriate cleaning and maintenance products can be used.
